

The EPIC BATTLE

between the warrior bacteria
and the evil waste

by Charis Wong

7 The warrior bacteria fought the battle against the harmful waste.

These warrior bacteria broke the harmful waste into smaller pieces, so that they can be adsorbed by the soil and become nutrients again.

RARR!!

ARGH!!!!

8 After a long battle, the warrior bacteria have won the war!

YAY!!

Hooray!!

Wahoo!!

11 And from then onwards, the humans & the bacteria live happily ever after ~~

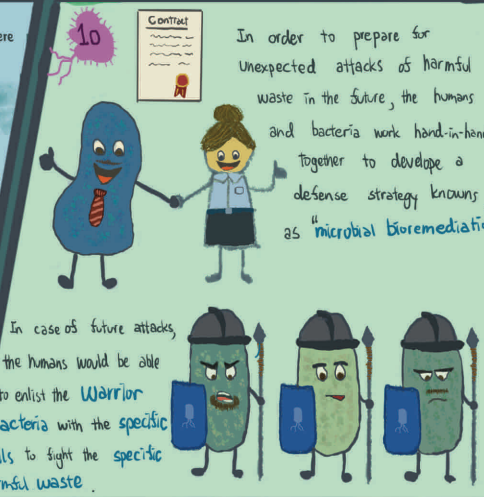

9 The humans have learnt their lessons, where they have put in place plans to treat the harmful waste. So that it will not get into the aquifer ever again!

Factory

Water Treatment

10 In order to prepare for unexpected attacks of harmful waste in the future, the humans and bacteria work hand-in-hand together to develop a defense strategy known as "microbial bioremediation".

Contract

In case of future attacks, the humans would be able to enlist the warrior bacteria with the specific skills to fight the specific harmful waste.

12 The End
